More of what employees need, for less of their money

With ZayZoon Boost, employees can take their earned wages early in the form of gift cards from major retailers, increasing their buying power by 5 - 20% on essentials like groceries, utilities, and much more.

How it works:

- Employees select Boost as a wallet option when taking an advance
- Employees receive their advance amount, with a Boost add-on in the form of an electronic gift card
- On the next payday, employee is deducted the advance amount and their regular flat fee, but keeps the Boost amount!
